

ATTACHMENT 4 CONTINGENCY PLAN

Contingency Plan

General Information

General Institute site information is located in Section B of the Part B application. The Institute Plant responds to emergency events in accordance with the Plant's Emergency Response Manual (Attachment G-1-1 of the Part B application). This manual also serves as the Plant's Contingency Plan and covers other regulatory requirements such as OSHA. This manual provides directions for all types of materials released including hazardous waste spills. In addition, the manual is designed to address spills and releases from different types of tanks, containers, process equipment, and vessels.

The site has its own emergency response squad which is HAZMAT trained. Included in their training is the site's annual RCRA training. This training instructs them on the proper handling, clean-up, and storage of hazardous materials.

Emergency Coordinators

See Attachment G-1-1, Section 7, page 1, Subsection 4.0 of the Part B application.

Implementation

See Attachment G-1-1, Section 3, Subsection 3.0, 4.0 and 5.0 of the Part B application.
